Scientists from NIST and other institutions have created the first neutron "Airy beam," which has unusual capabilities that ordinary neutron beams do not. This achievement could enhance ...

The team then contributed data to the developing materials-innovation infrastructure, making it easier for anyone to design new coinage materials in the future. "One of the big goals for ...

Materials Genome Initiative (federal government wide) NIST MGI Standard Reference Materials Plastics, carbon nanotubes, high-strength alloys, artificial bone and joint replacements are just some of the ...

materials needed for optical science research and industrial applications. The interaction of light with matter is different at different wavelengths and the techniques to measure the optical properties differ ...

NIST researchers have found special atomic patterns called quasicrystals in 3D-printed aluminum alloys. Quasicrystals increase the strength of 3D-printed aluminum, the researchers ...

The award will support Applied Materials in developing and scaling a disruptive silicon-core substrate technology for next-generation advances in packaging and 3D heterogeneous integration.

Materials by Design the Materials Genome Initiative at NIST The 2021 MGI Strategic Plan The Materials Genome Initiative marks its first decade with a new strategic plan. Read the summary, or get the full ...

Abstract In alignment with the Materials Genome Initiative and as the product of a workshop sponsored by the US National Science Foundation, we define a vision for materials ...

Art and materials innovation have always been intertwined, dating back to the earliest human creations.
