Is Huawei a good 5G company?

Huawei recently reported a 22% increase in sales last year, to 860 billion Chinese yuan (US\$ 118.6 billion), and it looks in better shape than its ailing western rivals. Its share of the global 5G networks market appears to have grown, according to the market research firm.

How big is the 5G technology market in 2025?

Hardware captured 47.55% of the 5G technology market share in 2025 as operators procured radio units, antennas, and transport routers for nationwide roll-outs. High-power massive-MIMO radios and fiber backhaul lines continue to attract capital, yet year-on-year growth is plateauing.

Is Huawei still a leader in the communication equipment industry in 2023?

In a market landscape fraught with geopolitical tensions, Huawei has managed to retain its top position globally in the communication equipment sector for 2023. A testament to its high-value product offerings, Huawei's resilience comes even as it faces mounting pressure to exit the European market.

What happened to Huawei's 5G infrastructure in 2023?

The UK began a phased replacement of Huawei's 5G infrastructure in October 2023. Germany, too, issued advisories to its telecom operators to curtail the use of Huawei and ZTE equipment starting September 2023. Romania went a step further, outright rejecting Huawei's 5G equipment proposal slated for March 2024.
