So while durable protectionist policies will likely push U.S. energy storage buyers to seek U.S.-assembled batteries, tariffs on key inputs mean those locally-produced alternatives will cost...

Two major areas of international trade that will remain causes of concern for energy storage projects are the application of tariffs and supply chain integrity.

There are also indications that the US administration may consider other tariff proposals impacting energy storage, such as a 10-20% universal tariff, tariffs of up to 60% across the board on Chinese ...

As this previously imported solar module inventory is depleted and suppliers fully incorporate the new tariffs into pricing, we're anticipating pricing increases for both solar modules ...

The OBBB and proposed tariffs represent a double-edged shift for the U.S. clean energy sector. In the near term, they are already raising system costs, constraining imports, and amplifying ...

While existing warehoused battery inventory offers a temporary buffer, analysts warn that by 2028 U.S. energy storage demand could exceed 100 GWh, sparking a supply scramble if tariffs persist.

The Biden administration's announcement marks a significant shift in the tariff framework for the energy storage industry. Under the new structure, the Section 301 tariff rate on lithium-ion non ...

This year has been tumultuous for the energy storage sector, with the industry plagued by significant uncertainty surrounding tariffs and new legislation, in particular U S imports from China -- the source ...

New analysis from Clean Energy Associates (CEA) and Wood Mackenzie highlights the challenges facing the US battery storage market due to trade tariffs.

Will energy storage products be subject to additional tariffs

"With tariff rates of 145 percent and the potential for additional tariffs, the impacts are already being felt," Daniel Finn-Foley, the vice president of energy storage at CEA and one of the ...
