A Reuters investigation, citing two individuals familiar with the matter, revealed that undocumented components were found during security inspections of inverters connected to the ...

Undocumented embedded devices have been found in Chinese inverters and batteries connected to power grids, raising growing concerns among US ...

Reuters was unable to determine how many solar power inverters and batteries they have looked at. The rogue components provide additional, undocumented communication channels ...

Power inverters, which are predominantly produced in China, are used throughout the world to connect solar panels and wind turbines to electricity grids.

Undocumented embedded devices have been found in Chinese inverters and batteries connected to power grids, raising growing concerns among US energy security officials.

U.S. energy officials are intensifying scrutiny of Chinese-manufactured power inverters, critical components in renewable energy systems, after discovering undocumented communication ...

Technical experts conducting detailed hardware inspections, or "teardowns," of inverters connected to U.S. power grids revealed the presence of unauthorized communication modules, ...

Experts have warned that communication devices could evade firewalls and switch inverters off remotely, posing a huge risk to power grids, as they could change settings, damage ...

U.S. energy officials have launched an investigation after discovering unauthorized communication equipment

Xiaomanyao solar-powered communication cabinet inverter is connected to the grid

embedded within Chinese-manufactured solar power inverters connected ...

This investigative article exposes the discovery of undocumented communication devices hidden in Chinese-made solar inverters, creating unprecedented vulnerabilities in global power grids.
